SUMMARY

Senior Software Engineer with 5+ years of experience designing, building, testing, deploying and supporting scalable software across the full software development lifecycle using Microsoft Azure, C#, .NET, React, and TypeScript. Successfully led enterprise software releases, automated engineering workflows that reduced deployment time by more than 95%, and developed AI-powered tools that improved developer productivity and knowledge sharing. Passionate about solving complex engineering problems and delivering high-quality, secure software that creates measurable business value.

EXPERIENCE

IFS R&D International (Pvt) Ltd

Jul 2025 – Jul 2026

Senior Software Engineer

Worked within the R&D CTO Office, delivering cloud platform engineering, release engineering, DevOps automation, and AI-powered developer productivity solutions supporting enterprise software development.

- Led release engineering for two major enterprise releases and multiple monthly releases, coordinating end-to-end software delivery across more than 10 engineering teams and multiple cloud environments while overseeing release planning, deployment, validation, post-release verification, and production support to deliver reliable, high-quality software releases.
- Reduced documentation deployment time from approximately 4 hours to under 3 minutes by designing and implementing an automated documentation platform using Azure Static Web Apps, MkDocs, and CI/CD pipelines.
- Improved release quality by strengthening deployment pipelines, increasing unit test coverage using SonarQube, remediating security vulnerabilities, and enforcing code quality standards across enterprise applications.
- Performed root cause analysis across cloud infrastructure, CI/CD pipelines, and enterprise applications, implementing long-term solutions that improved platform reliability and operational resilience.
- Designed and delivered an AI-powered engineering assistant using Microsoft Copilot Studio that indexed over 100 internal knowledge pages, increasing documentation usage fivefold and reducing time spent locating technical information.
- Led solution design and technical decision-making, evaluating implementation options, mitigating technical risks, and delivering scalable, secure, and maintainable enterprise software.
- Mentored junior engineers through code reviews, knowledge sharing, and technical guidance while promoting engineering best practices across the team.
- Applied AI-assisted coding tools, including GitHub Copilot and Cursor, to accelerate implementation, debugging, refactoring, test generation, and documentation while maintaining code quality, security, and engineering standards.

Xyicon LK (Pvt) Ltd

Sep 2022 – Jul 2025

Software Engineer

- Delivered more than 10 production features by leading end-to-end development from requirements gathering through production deployment, partnering with product owners, designers, and engineers to build scalable enterprise applications using React and TypeScript.
- Designed and implemented over 50 reusable React components, improving code reuse, UI consistency, and long-term maintainability.
- Developed a Revit add-in using C# and WPF, enabling seamless integration between desktop engineering workflows and cloud-based applications.
- Improved application performance through API optimisation, caching strategies, and memory usage improvements, delivering faster response times across key workflows.
- Resolved over 100 software defects and enhancement requests, improving platform stability, maintainability, and user experience.
- Developed more than 100 automated end-to-end tests and more than 20 unit tests, reducing manual regression testing time from approximately 3 hours to 20 minutes.
- Participated in architecture discussions, code reviews, technical planning sessions, and Agile ceremonies to continuously improve software quality and engineering standards.

Temporary Instructor

- Published peer-reviewed research in IEEE Access by extending undergraduate research into a multidisciplinary engineering publication.
- Supported faculty research through software development, testing, debugging, technical documentation, and data analysis.
- Mentored undergraduate engineering teams by providing technical guidance, coordinating Agile development activities, and supporting successful project delivery.

Geveo Australasia Pvt Ltd

Apr 2021 – Aug 2021

Software Engineer Intern

- Actively contributed to two full-stack software development projects within Agile teams.
- Developed and enhanced application features in alignment with business requirements and functional specifications, ensuring high performance, reliability, and scalability.
- Diagnosed and resolved functional and performance issues, and implemented unit tests to maintain code quality, stability, and long-term maintainability.

EDUCATION**Bachelor of Science of Engineering (First Class Honours)**

Nov 2016 – Sep 2021

Computer Engineering, GPA: 3.70/4.00

University of Peradeniya

SKILLS**Programming Languages:** TypeScript, JavaScript, C#, Python, Java, SQL**Frontend Development:** React, React Hooks, jQuery, HTML5, CSS3**Backend Development:** Node.js, REST APIs, Express.js, .NET**Cloud & DevOps:** Microsoft Azure, Azure DevOps, Azure Functions, Azure Static Web Apps, Azure Storage, Azure CLI, Azure Resource Manager (ARM), Microsoft Entra ID, CI/CD, GitLab, Bitbucket Pipelines**Testing & Quality Assurance:** Cypress, Unit Testing, End-to-End Testing, Test Automation, SonarQube**Automation & Documentation:** Microsoft Copilot Studio, Microsoft 365 Copilot, PowerShell, Bash, YAML, JSON**Development Tools & Frameworks:** Git, Visual Studio, Visual Studio Code, Postman, WPF, Revit API, MkDocs**Engineering Practices:** Object-Oriented Programming (OOP), Design Patterns, Release Engineering, Solution Design, Agile, Scrum, System Integration, Root Cause Analysis, Production Support, Technical Documentation**RESEARCH PUBLICATIONS****Mixed Reality-based Multi-Agent Robotics Framework for Artificial Swarm Intelligence Experiments***IEEE Access: The Multidisciplinary Open Access Journal DOI: [10.1109/ACCESS.2023.3317434](https://doi.org/10.1109/ACCESS.2023.3317434)***Segmentation and significance of herniation measurement using Lumbar Intervertebral Discs from the Axial View***Moratuwa Engineering Research Conference DOI: [10.1109/MERCon55799.2022.9906245](https://doi.org/10.1109/MERCon55799.2022.9906245)***ACCOMPLISHMENTS**

- **MERCon 2021:** Best Research Paper
- **ESCaPe 2021:** Best Research Presentation
- **ACES Hackathon 2019:** First Place
- **IEEEExtreme 13.0:** Country Rank: 21, Global Rank: 436
- **IEEEExtreme 12.0:** Country Rank: 38, Global Rank: 499
- **Google Hash Code 2019:** Country Rank: 24
